

KIAN J. FONTILLAS

Full Stack Developer

Purok Pag-asa, Bulawen, Palauig, Zambales | +63 976 415 1711 | fontillaskian@gmail.com

OBJECTIVE

Results-driven Full Stack Developer with hands-on experience building scalable web and mobile applications from end to end · from crafting high-performance, user-centric interfaces to architecting secure and efficient backend systems. Proven ability to integrate advanced technologies such as computer vision and NLP into practical, real-world solutions. Adept at leading development lifecycles, collaborating across teams, and delivering clean, maintainable codebases that bridge technical precision with exceptional user experiences.

EDUCATION

Bachelor of Science in Information Technology

2022 – 2026

President Ramon Magsaysay State University, Iba, Zambales

- College of Communications and Information Technology (CCIT)
- Core Focus: Full-Stack Web & Mobile Development, Machine Learning, and Software Architecture
- Relevant Coursework: Advanced Software Architecture, Biometric & Intelligent Systems

ON-THE-JOB TRAINING (OJT) EXPERIENCE

Frontend Developer Intern

Dec 2025 – Apr 2026

President Ramon Magsaysay State University, Iba, Zambales

- Served as a Frontend Developer Intern, engineering modern, user-centric web applications and dynamic user workflows to optimize and automate institutional operations.
- Structured specialized proposal evaluation pipelines — separating unassigned documents from active assignments — and built secure, intuitive frontend control panels for real-time review tracking.
- Conceptualized a minimalist Administrative Portal prioritizing data scannability while handling complex client-side state logic and backend integration for seamless performance.

PROJECTS

Face Recognition Attendance Monitoring System (CCIT)

Jan 2025 – Nov 2025

Project Leader & Full Stack Developer | github.com/meuorii/Capstone-FRAMS

- Served as Project Leader managing the full development lifecycle to deploy a precise facial recognition system utilizing an ArcFace backbone, optimizing verification thresholds through embedding density plot analysis.
- Architected and scaled both the client-facing interfaces and secure backend infrastructure, ensuring high-speed data flow and real-time authentication logging across campus edge devices.
- Conceptualized and designed a premium administrative dashboard featuring clean, highly scannable layouts for real-time student tracking, roster management, and automated report generation.

BERT-Based Citizen Feedback Decision Support System (LGU Iba)

Jan 2026 – Feb 2026

Frontend Developer |

github.com/Gwenn01/BERT_Based_Citizen_Feedback_Decision_Support_System

- Engineered a high-performance, modern web interface for a municipal decision support system, collaborating closely with backend systems to deliver clean and responsive user experiences.
- Designed and implemented frontend integration layers to display real-time classification and BERT-based sentiment tracking metrics derived from citizen feedback data.
- Built a premium administrative portal with advanced filtering and interactive dashboards, optimizing client-side state management to ensure lightning-fast layout updates.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, TypeScript, JavaScript, Responsive Web Design, State Management

Backend: Node.js, Express.js, Python, Flask, Django, RESTful APIs, Secure User Authentication

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Database Management

Tools & AI/ML: Git, Postman, Machine Learning, Computer Vision, ArcFace, BERT
